The workspace of the future starts with Zens

Empowering
Freedom

1

Smart, sustainable solutions for wireless charging and workspace management

At Zens, we create solutions that make workspaces, meeting rooms and phone cabins smarter, more efficient and future-proof. Combine innovation, simplicity and sustainability and experience a workspace that really works.

2

A smart, sustainable workspace

Avoid cables and chaos, integrate technology and puts sustainability front and center.

An organised workspace increases productivity and job satisfaction. With Zens, you make your workspace smarter, more efficient and more sustainable.

Our wireless charging and workspace management solutions combine functionality, innovation and sustainability.

The benefits of wireless charging

- **Sustainable**
Reduce cable waste and battery consumption, take steps toward less e-waste.
- **No cable stress**
Eliminate cables and chaos for a tidy workspace.
- **Multifunctional solutions**
Charge multiple devices simultaneously.

With Zens, you not only charge your devices, but also create a workspace that is future-proof.

3

Insight and efficiency, get more out of your office

Real-time data for a workspace that works.

Zens Desk Management System (DMS) is an innovative solution that combines smart wireless charging with real-time monitoring of workspace occupancy. The system is specifically designed to make modern workspaces more efficient, attractive and sustainable.

With Zens DMS, you save costs and simultaneously improve the workspace experience with insights into workspace usage.

Data-driven decision-making

Based on usage data, you can make decisions about space planning and resource allocation.

Occupancy

Use spaces optimally and plan more effectively.

Cleaning management

Clean only what is needed, thanks to a smart LED indicator.

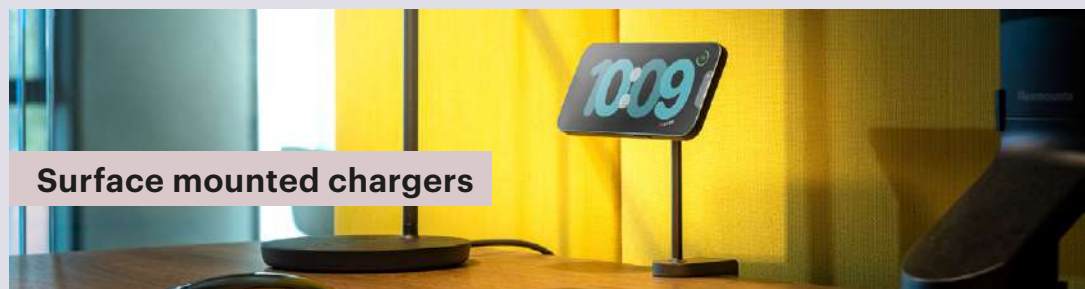

Zens DMS integrates seamlessly with existing smart building and IWMS systems. Work smarter, save costs and future-proof your workspace. Thanks to Narrow Band IoT technology, the system operates completely independently of your IT or WiFi network. This guarantees a secure, reliable connection.

4

Products that transform your workspace

Sustainable, smart and integrated solutions for any office.

Zens is all about simplicity, innovation and sustainability. Our products are designed to make your workspace smarter and more efficient:

Built-in chargers offer flexibility

Built-in Wireless chargers provide flexibility in workspaces where a fixed installation is unnecessary or practical. These chargers are suitable for rapid and easy charging in both permanent and temporary locations.

Their sleek and compact form makes them ideal for use in any area.

Advantages

- Integrated into furniture for a minimalistic office design.
- Compatible with all Qi devices.
- Reduces cable usage and keeps workstations tidy.

Smart built-in chargers, technology and data in one solution

Smart built-in chargers take wireless charging to the next level. With features such as real-time occupancy data and LED feedback, they combine the convenience of wireless charging with insights. These chargers integrate seamlessly into smart building systems and contribute to more efficient office design.

Advantages

- Combines charging with data collection.
- LED feedback for vitality and cleaning management.
- Real-time insights through a user-friendly dashboard.

Surface mounted chargers: **flexible, stylish** and always at your fingertips

Surface mounted chargers offer maximum flexibility for workspaces where a fixed installation neither necessary nor possible. These chargers are ideal for quick and easy charging in both fixed and temporary spaces.

With a sleek and compact design, they are perfect for use in any environment.

Advantages

- No installation required: simply mount and connect.
- Moveable and ideal for flexible workstations.

Zens software, **your workspace** at a glance

Zens Desk Management System provides a complete overview of workspaces, meeting rooms and other office spaces in the form of a dashboard. Thanks to real-time occupancy data, you can better utilise workspaces, reduce costs and improve sustainability.

The intuitive interface makes it easy to analyze data and action. From workspace occupancy to cleaning management, the dashboard lets you get the most out of your office environment.

Advantages

- Real-time occupancy information in a user-friendly interface.
- Optimise workspace utilisation.

5

Leading collaborations for workspaces of the future

Building smarter and more sustainable workspaces together.

Our solutions are trusted by industry leaders such as Deloitte and Just Eat Takeaway.com. In addition, we partner with technology pioneers such as Apple, Google and Samsung. Thanks to these collaborations, we contribute to an ecosystem that makes workspaces more productive, sustainable and efficient.

VodafoneZiggo

VodafoneZiggo has implemented Zens Desk Management System in their offices. Each workstation is equipped with a Zens Smart PuK Visual, a wireless charger with motion sensor, which collects real-time occupancy data. This data enables VodafoneZiggo to optimise space utilisation, save costs on rent and facility services, and reduce their carbon footprint.

In addition, wireless charging provides additional convenience for employees and enhances the overall work experience.

Just Eat Takeaway.com

Data-driven workspace optimisation. Zens implemented Zens Desk Management System at Just Eat Takeaway.com.

The data collected helps optimise office layout and facilitates more efficient cleaning management.

In addition, the LED indicators make it easy for employees to find available workspaces and provide subtle vitality triggers for movement.
